RESOURCE CONSENT APPLICATIONS FOR GLENBROOK STEEL MILL:

Notice Under Section 62 (3) Of
Marine and Coastal Area (Takutai Moana) Act 2011
To Applicants for Customary Marine Title

Tēna koe

New Zealand Steel (NZ Steel) understands that you have made an application for customary marine title or protected customary right under section 62(3) of the Marine and Coastal Area (Takutai Moana) Act 2011 in the area relevant to the Glenbrook Steel Mill (the Manukau Harbour, and in particular the Waiuku channel).

We wish to notify and seek your views in relation to a resource consent application that will be lodged for the ongoing operations of the Steel Mill, located at Glenbrook. The application will seek to replace existing consents for its water discharge to and occupation of, the Coastal Marine Area (CMA). These existing consents are due to expire in late 2021.

Since 1968 the Steel Mill has operated on the eastern bank of the Waiuku River, which is a long and relatively narrow tidal arm of the Manukau Harbour. The NZ Steel application, currently being prepared, will address the following activities within the CMA:

- Discharge of treated process water and stormwater into the coastal marine area, from the existing Northside Outfall;
- Discharge of treated process water and stormwater into the coastal marine area, from the existing Southside Outfall;
- Occupation of part of the coastal marine area by the existing Southside Outfall discharge structure, which is located just seaward of mean high water springs.

Renewing these consents will ensure that the Steel Mill is able to continue its well established operations. The NZ Steel business is essential for the local and national community contributing significantly by:

- Creation of over 4000 jobs (directly and indirectly) within Auckland and the wider area;
- Providing over \$600 million per annum to the New Zealand economy;

For every tonne of steel produced in New Zealand, 80% of the dollars spent on that steel stay within New Zealand, compared to only 5% of the dollars spent on imported steel.

NZ Steel intends to lodge the resource consent applications in April 2021. The resource consent application is likely to be publicly notified through the Resource Management Act 1991 consenting process and therefore you will have an opportunity to make submissions through that process also, should you wish to do so.

We would be grateful if you could please provide any views no later than 12 December 2020. Our address and contact details are provided above. Please contact us if you would like to discuss the project further, or require any further information.

Ngā mihi mō ō whakaaro e pā ana ki tēnei pukapuka tono. Thank you for your time in considering this application.

RESOURCE CONSENT APPLICATIONS FOR GLENBROOK STEEL MILL:
Notice Under Section 62 (3) Of
Marine and Coastal Area (Takutai Moana) Act 2011
To Applicants for Customary Marine Title

Tēna koe

Further to our correspondence in regard to the resource consent application for New Zealand Steel (NZ Steel) dated 11 November 2020, we would like to provide you with a few updates and request your view on an additional resource consent.

As previously described, the application will seek to replace existing consents for its water discharge to, and occupation of, the Coastal Marine Area (CMA) which expire later in 2021. As part of the preparation of the application, we have had a survey undertaken of our two outfall structures and have discovered that a very small portion of the Northside Outfall is currently within the coastal marine area (CMA). On this basis, it is now proposed to seek an occupation consent for this structure within the CMA. This was not identified in our previous notification to you.

In terms of timing of the lodgement of the consent application this is now going to occur in June 2021 (not April 2021 as previously indicated). The resource consent application is likely to be publicly notified through the Resource Management Act 1991 consenting process and therefore you will have an opportunity to make submissions through that process, should you wish to do so.

This letter is notification under section 62(3) of the Marine and Coastal Area (Takutai Moana) Act 2011. We wish to seek your views on the following additional activity in the CMA, that wasn't included in our letter of 11 November 2020:

- Occupation of part of the coastal marine area by the existing Northside Outfall discharge structure, a portion of which is located just seaward of mean high water springs.

We would be grateful if you could please provide any views on this addition no later than 11 June 2021. Alternatively, please contact us should you wish to discuss this matter further.

As part of the preparation of the application, we have had a survey undertaken of our two outfall structures and have discovered that a very small portion of the Northside Outfall is currently within the coastal marine area (CMA). On this basis, it is now proposed to seek an occupation consent for this structure within the CMA. This was not identified in our previous notification to you.

In terms of timing of the lodgement of the consent application this is now going to occur in June 2021 (not April 2021 as previously indicated). The resource consent application is likely to be publicly notified through the Resource Management Act 1991 consenting process and therefore you will have an opportunity to make submissions through that process, should you wish to do so.

This letter is notification under section 62(3) of the Marine and Coastal Area (Takutai Moana) Act 2011. We wish to seek your views on the following additional activity in the CMA, that wasn't included in our letter of 11 November 2020:

- Occupation of part of the coastal marine area by the existing Northside Outfall discharge structure, a portion of which is located just seaward of mean high water springs.

We would be grateful if you could please provide any views on this addition no later than 11 June 2021. Alternatively, please contact us should you wish to discuss this matter further.

Ngā mihi mō ō whakaaro e pā ana ki tēnei pukapuka tono. Thank you for your time in considering this application.

Ngā mihi

RESOURCE CONSENT APPLICATIONS FOR GLENBROOK STEEL MILL:
Notice Under Section 62 (3) Of
Marine and Coastal Area (Takutai Moana) Act 2011
To Applicants for Customary Marine Title

Tēna koe

Further to our correspondence in regard to the resource consent application for New Zealand Steel (NZ Steel) dated 11 November 2020, we would like to provide you with a few updates and request your view on an additional resource consent.

As previously described, the application will seek to replace existing consents for its water discharge to, and occupation of, the Coastal Marine Area (CMA) which expire later in 2021. As part of the preparation of the application, we have had a survey undertaken of our two outfall structures and have discovered that a very small portion of the Northside Outfall is currently within the coastal marine area (CMA). On this basis, it is now proposed to seek an occupation consent for this structure within the CMA. This was not identified in our previous notification to you.

In terms of timing of the lodgement of the consent application this is now going to occur in June 2021 (not April 2021 as previously indicated). The resource consent application is likely to be publicly notified through the Resource Management Act 1991 consenting process and therefore you will have an opportunity to make submissions through that process, should you wish to do so.

This letter is notification under section 62(3) of the Marine and Coastal Area (Takutai Moana) Act 2011. We wish to seek your views on the following additional activity in the CMA, that wasn't included in our letter of 11 November 2020:

Attachments: Cletus Manu Paul.pdf; Enclosure - Site Map.pdf

Tena koe,

Following up with our correspondence from November 2020 we would like to update you that the resource consent referred to below is still in progress. The delay is due to a change in the scope of the consent application. This is related to a change in the steel-making methodology involving the installation of an electric arc furnace. This did not result in changes of the environmental effects for the water discharges. The updated application documents will be submitted to Auckland Council shortly.

Please let us know if you have any questions.

Ngā mihi,

Subject: Te Whakakitenga o Waikato MACAA Notification

Tena koe,

We understand that Te Whakakitenga o Waikato has made an application for customary marine title or protected customary right under the current Marine and Coastal Area Act. Please find attached a notification document in relation to New Zealand Steel resource consents to be lodged in relation to the Glenbrook Steel Mill.

If you have any questions, please do not hesitate to contact us.

Ngā mihi,

Edit Simpson | Environmental Advisor
